No 305/2011 of the European
Parliament and of the Council of 9
March 2011

MEMBER OF EOTA

European Technical Assessment ETA-22/0052 of 2024/06/24

I General Part

Technical Assessment Body issuing the ETA and designated according to Article 29 of the Regulation (EU) No 305/2011: ETA-Danmark A/S

Trade name of the
construction product:

System Flammotect

Product family to which the
above construction product
belongs:

Ablative fire stopping product used in penetration seals

Manufacturer:

Flamro Brandschutz-Systeme GmbH
Am Sportplatz 2
DE-56291 Leiningen
Tel +49 4105 4090 0
Internet www.flamro.de

Manufacturing plant:

Plant LEI

This European Technical
Assessment contains:

185 pages including 179 annexes which form an
integral part of the document

This European Technical
Assessment is issued in
accordance with Regulation
(EU) No 305/2011, on the
basis of:

EAD 350454-00-1104:
Fire stopping and fire sealing products - Penetration
seals

This version replaces:

The previous ETA with the same number, issued on
2024-01-12

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full (excepted the confidential Annex(es) referred to above). However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product

The construction product "System Flammotect" is an ablative coating material. It is delivered as a filler of white colour and form on the surfaces to be protected layers which, when exposed to fire, consume energy or release matter through chemical or physical processes. In the process, they remain sufficiently stable and prevent the passage of heat, flame and/or smoke.

Detailed specifications for identification and performance criteria relevant for fire safety with regard to the construction products are given in the annexes.

NOTE:

The characteristics listed can serve both for identifying the construction products as well as for performing the manufacturer's factory production control.

2 Specification of the intended use(s) in accordance with the applicable European Assessment Document (hereinafter EAD)

The construction products "System Flammotect" is intended for use as components with a fire protection effect in building elements, assembled systems or constructions that are subject to requirements related to fire protection. Their reactive effect prevents heat transmission and fire spreading in the event of fire.

Within the scope of this ETA, the fire resistance was demonstrated for mixed or cable penetration seals which consisted of the components listed in table 1. Mixed or cable penetration seals are used to seal off openings in fire resistant walls or floors, which are penetrated by cables and/or pipes, and serves to preserve the walls' or floors' fire resistance in the area of the penetrations.

Product type	Trade name
Ablative coating	System Flammotect
Mineral fibreboards	Mineral fibre board in accordance with EN 13162 thickness ≥ 50 mm density 150 kg/m^3 Reaction to fire classification in accordance with EN 13501-1: Class A1

Product type	Trade name
Mineral fibre mats	Mineral fibre lamella mat in accordance with EN 14303 Reaction to fire class acc. to EN 13501-1: A2-s1, d0 or A1 Bulk density: $\geq 35 \text{ kg/m}^3$ Melting point: $\geq 1000 \text{ }^\circ\text{C}$
Mineral fibre pipe shells	pipe shell of concentrically wrapped rockwool – unbacked in accordance with EN 14303 density: $100 \text{ kg/m}^3 - 120 \text{ kg/m}^3$ Reaction to fire class acc. to EN 13501-1: A2-s1, d0 or A1 Bulk density: $\geq 80 \text{ kg/m}^3$ Melting point: $\geq 1000 \text{ }^\circ\text{C}$
FEF-Insulation	Insulation made of flexible elastomeric foam (FEF) in accordance with EN 14304 Reaction to fire class acc. to EN 13501-1: B-s3, d0
Mineral wool, loose stone wool	rockwool with grid strengthened and aluminium foil according to the general building supervisory board approval Z-23.14-1115 density: $40 \text{ kg/m}^3 - 50 \text{ kg/m}^3$ Reaction to fire class acc. to EN 13501-1: A1 Melting point: $\geq 1000 \text{ }^\circ\text{C}$

Table 1 – components of the verified penetration seals

Detailed information and data on the verified penetration seals are given in the annexes. The performances given in Section 3 exclusively relate to this penetration seals (e.g. with respect to the design and arrangement of the components of the penetration seals and the type and position of the services).

The provisions made in this European Technical Assessment are based on an assumed working life of the "System Flammotect" of at least 10 years, provided that the installation systems products are subject to appropriate installation.

The indications given on the working life cannot be interpreted as a guarantee given by the manufacturer or the Assessment Body but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment.

Characteristic	Assessment of characteristic
3.2 Safety in case of fire (BWR 2)	
Reaction to fire	The product classified as Euroclass E in accordance with EN 13501-1 and delegated regulation 2016/364.
Resistance to fire	Classified in accordance with EN 13501-2, see annexes 1 – 177 for details
3.3 Hygiene, health and the environment (BWR 3)	
Air permeability	No performance assessed
Water permeability	No performance assessed
Content, emission and/or release of dangerous substances*	No performance assessed
3.4 Safety and accessibility in use (BWR 4)	
Mechanical resistance and stability	No performance assessed
Resistance to impact/movement	No performance assessed
Adhesion	No performance assessed
Durability	Use category X
3.5 Protection against noise (BWR 5)	
Airborne sound insulation	No performance assessed
3.6 Energy economy and heat retention (BWR 6)	
Thermal properties	No performance assessed
Water vapour permeability	No performance assessed

See additional information in Chapter 3.7-3.8

*) In addition to the specific clauses relating to dangerous substances contained in this European technical Assessment, there may be other requirements applicable to the products falling within its scope (e.g., transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

3.7 Methods of verification

The assessment of the performance of " System Flammotect" is in relation to the applicable BWR's has been made in accordance with the European Assessment Document (EAD) no. EAD 350454-00-1104: Fire stopping and fire sealing products - Penetration seals, as an ablative coating.

3.8 General aspects related to the fitness for use of the product.

The verification of durability is part of testing the essential characteristics. The ablative coating " System Flammotect" may be used in end-use applications according to the provisions for use category X (external use) without expecting significant changes of the characteristics relevant for fire protection. Products that meet requirements for type X, meet the requirement for all other types.

If the ablative coating according to this ETA is to be exposed to specific stresses, further tests are necessary.

The European Technical Assessment is issued for the product based on agreed data/information, deposited with ETA-Danmark, which identifies the product that has been assessed and judged. Changes to the product or production process, which could result in this deposited data/information being incorrect, should be notified to ETA-Danmark before the changes are introduced. ETA-Danmark will decide if such changes affect the ETA and consequently the validity of the CE marking based on the ETA and if so whether further assessment or alterations to the ETA, shall be necessary.

The "System Flammotect" is manufactured in accordance with the provisions of this European Technical Assessment using the manufacturing processes as identified in the inspection of the plant by the notified inspection body and laid down in the technical documentation.

4 Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base.

4.1 AVCP system

According to the decision 1999/454/EC as amended by 2001/596/EC, the system(s) of assessment and verification of constancy of performance (see Annex III to Regulation (EU) No 305/2011) is **1** .

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD.

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at ETA-Danmark prior to CE marking.

Issued in Copenhagen on 2024-06-24 by

Thomas Bruun
Managing Director, ETA-Danmark

Penetration sealing system made of mineral wool and ablative filler ($\geq 3,0$ mm dft)

Empty seal

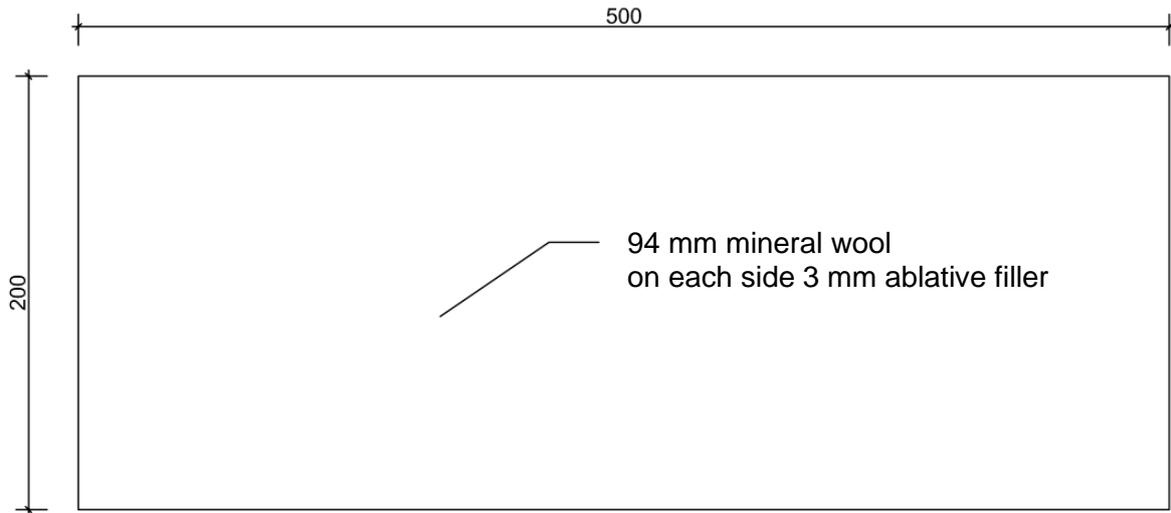

Mixed penetration seal "ES"

lightweight partition wall, thickness 100 mm

rectangular penetration seal w x h = 500 mm x 200 mm, no aperture framing, seal depth 100 mm

Service	Measures	Wall Fire resistance class
Speed pipes, bundles or single pipes, with or without glass fibre or micro cables		
max. 24 pcs. outside pipe- $\varnothing \leq 7$ mm	Intumescent wrap 2 x 62,5 / 1 x 125 mm	EI 120 U/U
max. 7 pcs. outside pipe- $\varnothing \leq 10$ mm	Intumescent wrap 2 x 62,5 / 1 x 125 mm	EI 120 U/U
max. 5 pcs. outside pipe- $\varnothing \leq 12$ mm	Intumescent wrap 2 x 62,5 / 1 x 125 mm	EI 120 U/U

- 1. Rigid wall ≥ 100 mm thickness
- 2. Flexible wall 100 mm thickness
- 3. Mineral fibre board
- 4. Ablative Coating

- 5. Intumescent wrap
- 6. Speed pipes
- 7. Floor ≥ 150 mm thickness

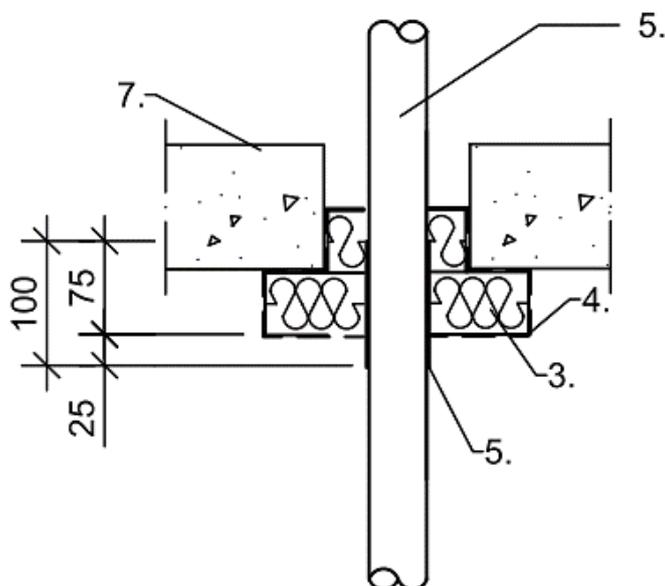

Dimensions in mm

System Flammotect	Annex 168
Mixed penetration seal made of mineral fibre boards with ablative coating for one-sided installation in shaft wall, walls and floors	

Mixed penetration seal made of mineral fibre boards with ablative coating ($\geq 0,75$ mm dft) for one-sided installation in shaft wall, walls and floors

Installation in floors, 2-layer

Combustible pipes with intumescent wrap

Fire resistance classes - Floor		
Service	Measures	Floor Fire resistance class
Combustible pipe		
Outside pipe- $\varnothing \leq 50$ mm	Intumescent wrap 100 mm 1 x 2 layer	EI 90 U/C
Outside pipe- $\varnothing \leq 70$ mm	Intumescent wrap 100 mm 1 x 2 layer	EI 120 U/C
Outside pipe- $\varnothing \leq 110$ mm	Intumescent wrap 100 mm 1 x 3 layer	EI 120 U/C
Outside pipe- $\varnothing \leq 110$ mm	Intumescent wrap 100 mm 1 x 4 layer	EI 120 U/C

- 3. Mineral fibre board
- 4. Ablative Coating
- 5. Intumescent wrap

- 6. Combustible pipes
- 7. Floor ≥ 150 mm thickness

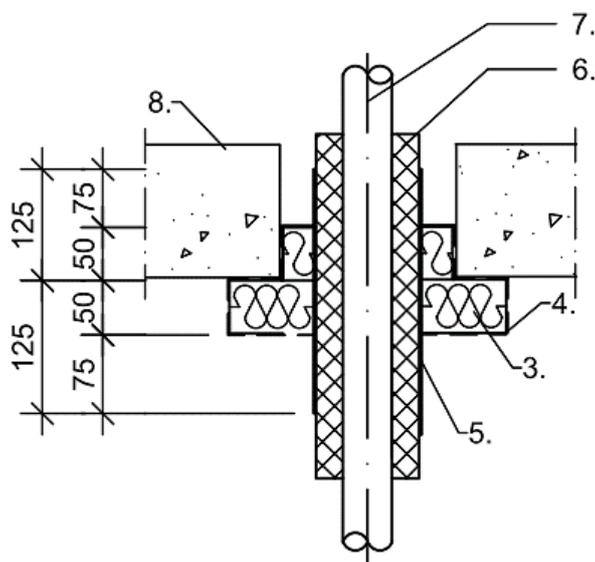

Dimensions in mm

System Flammotect	Annex 169
Mixed penetration seal made of mineral fibre boards with ablative coating for one-sided installation in shaft wall, walls and floors	

Mixed penetration seal made of mineral fibre boards with ablative coating ($\geq 0,75$ mm dft) for one-sided installation in shaft wall, walls and floors

Installation in floors, 2-layer

Non-combustible pipes made of copper, steel stainless steel or cast iron with combustible insulation made of FEF with intumescent wrap

Fire resistance classes - Floor		
Service	Measures	Floor Fire resistance class
Combustible pipe		
Outside pipe- $\varnothing \leq 15$ mm	$\geq 400 / 750$ mm (bottom top) x 25 mm + intumescent wrap 2 x 62,5 / 1 x 125 mm 1 x 2 layers	EI 90 C/U / E 120
Outside pipe- $\varnothing \leq 15$ mm	$\geq 400 / 750$ mm (bottom top) x 13 - 24 mm + intumescent wrap 2 x 62,5 / 1 x 125 mm 1 x 2 layers	EI 120 C/U
Outside pipe- $\varnothing \leq 28$ mm	$\geq 400 / 750$ mm (bottom top) x 19 - 25 mm + intumescent wrap 2 x 62,5 / 1 x 125 mm 1 x 2 layers	EI 120 C/U
Outside pipe- $\varnothing \leq 42$ mm	$\geq 400 / 750$ mm (bottom top) 19 x 24 mm + intumescent wrap 2 x 62,5 / 1 x 125 mm 1 x 2 layers	EI 90 / E 120 C/U
Outside pipe- $\varnothing \leq 42$ mm	$\geq 400 / 750$ mm (bottom top) 25 mm + intumescent wrap 2 x 62,5 / 1 x 125 mm 1 x 2 layers	EI 120 C/U

- 3. Mineral fibre board
- 4. Ablative Coating
- 5. Intumescent wrap

- 6. FEF
- 7. Non-combustible pipe
- 8. Floor ≥ 150 mm thickness

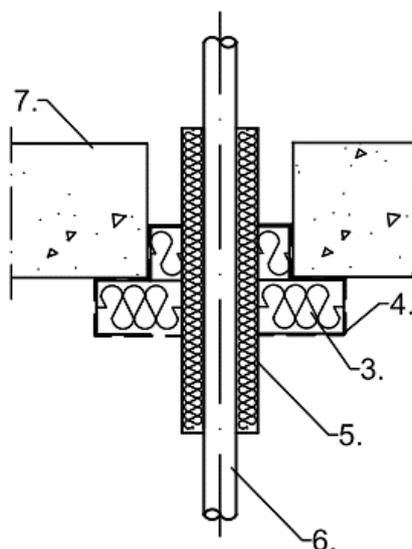

Dimensions in mm

System Flammotect	Annex 170
Mixed penetration seal made of mineral fibre boards with ablative coating for one-sided installation in shaft wall, walls and floors	

Mixed penetration seal made of mineral fibre boards with ablative coating ($\geq 0,75$ mm dft) for one-sided installation in shaft wall, walls and floors

Installation in floors, 2-layer

Multilayer composite pipes HENCO pipes with lamella mat

Fire resistance classes - Floor		
Service	Measures	Floor Fire resistance class
Multilayer composite pipes HENCO-pipes		
Outside pipe- $\varnothing \leq 12$ mm wall thickness $\geq 1,6$ mm	Lamella mat [L X T] ≥ 500 mm x ≥ 20 mm	EI 120 U/C
Outside pipe- $\varnothing \leq 63$ mm wall thickness $\geq 4,5$ mm	Lamella mat [L X T] ≥ 500 mm x ≥ 30 mm	EI 120 U/C

- 3. Mineral fibre board
- 4. Ablative Coating
- 5. Lamella mat

- 6. Multilayer composite pipe
- 7. Floor ≥ 150 mm thickness

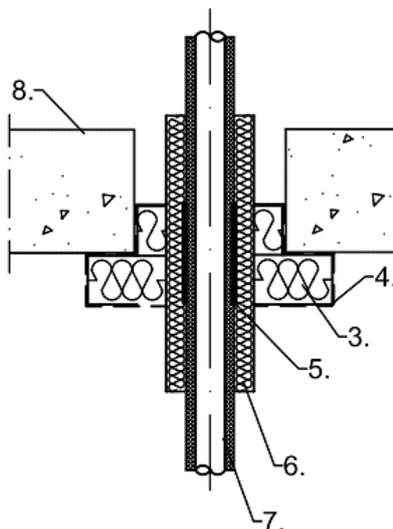

Dimensions in mm

System Flammotect	Annex 171
Mixed penetration seal made of mineral fibre boards with ablative coating for one-sided installation in shaft wall, walls and floors	

Mixed penetration seal made of mineral fibre boards with ablative coating (≥ 0,75 mm dft) for one-sided installation in shaft wall, walls and floors

Installation in floors, 2-layer

Multilayer composite pipes HENCO pipes, pre-insulated with PEF with intumescent wrap and coated on both sides with lamella mat

Fire resistance classes - Floor		
Service	Measures	Floor Fire resistance class
Multilayer composite pipes HENCO-pipes, pre-insulated		
Outside pipe-Ø ≤ 32 mm	Lamella mat [L X T] ≥ 500 mm x ≥ 20 mm intumescent wrap 100 mm 2 x 1 layer	EI 120 U/C

- 3. Mineral fibre board
- 4. Ablative Coating
- 5. Intumescent wrap

- 6. Lamella mat
- 7. Multilayer composite pipe
- 8. Floor ≥ 150 mm thickness

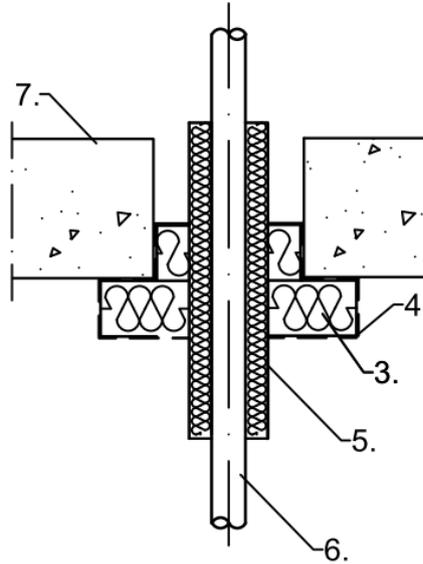

Dimensions in mm

System Flammotect	Annex 172
Mixed penetration seal made of mineral fibre boards with ablative coating for one-sided installation in shaft wall, walls and floors	

Mixed penetration seal made of mineral fibre boards with ablative coating (≥ 0,75 mm dft) for one-sided installation in shaft wall, walls and floors

Installation in floors, 2-layer

Non-combustible pipes made of copper, steel, stainless steel or cast iron with lamella mat

Fire resistance classes - Floor		
Service	Measures	Floor Fire resistance class
Non-combustible pipes made of copper, steel, stainless steel or cast iron		
Outside pipe-Ø ≤ 28 mm	Lamella mat (top/bottom) ≥ 500 mm x ≥ 500 mm x ≥ 30 mm	EI 120 U/C
Outside pipe-Ø ≤ 42 mm	Lamella mat (top/bottom) ≥ 500 mm x ≥ 500 mm x ≥ 40 mm	EI 120 U/C
Outside pipe-Ø ≤ 54 mm	Lamella mat (top/bottom) ∞ ≥ 950 mm x ≥ 40 mm	EI 120 U/C
Outside pipe-Ø ≤ 54 mm	Lamella mat (top/bottom) ≥ 500 m / 1000 mm x ≥ 30 mm + Lamella mat ≥ 950 mm x ≥ 30 mm + Lamella mat ≥ 500 mm x ≥ 30 mm	EI 120 U/C
Outside pipe-Ø ≤ 88,9 mm	Lamella mat (top/bottom) ∞ ≥ 950 mm x ≥ 50 mm	EI 120 U/C
Outside pipe-Ø ≤ 88,9 mm	Lamella mat (top/bottom) ≥ 500 / 1000 mm x ≥ 50 mm + lamella mat ≥ 500 mm x ≥ 50 mm	EI 120 U/C
Non-combustible pipes made of steel, stainless steel or cast iron		
Outside pipe-Ø ≤ 63,5 mm	Lamella mat (top/bottom) ∞ ≥ 950 mm x ≥ 300 mm	EI 120 U/C
Outside pipe-Ø ≤ 63,5 mm	Lamella mat (top/bottom) ≥ 500 / 1000 mm x ≥ 30 mm + lamella mat ≥ 500 mm x ≥ 30 m	EI 120 U/C
Outside pipe-Ø ≤ 114,3 mm	Lamella mat (top/bottom) ∞ ≥ 950 mm x ≥ 50 mm	EI 120 U/C
Outside pipe-Ø ≤ 114,3 mm	Lamella mat (top/bottom) ≥ 500 / 1000 mm x ≥ 50 mm + lamella mat ≥ 950 mm x ≥ 30 m	EI 120 U/C

- 3. Mineral fibre board
- 4. Ablative Coating
- 5. Lamella mat

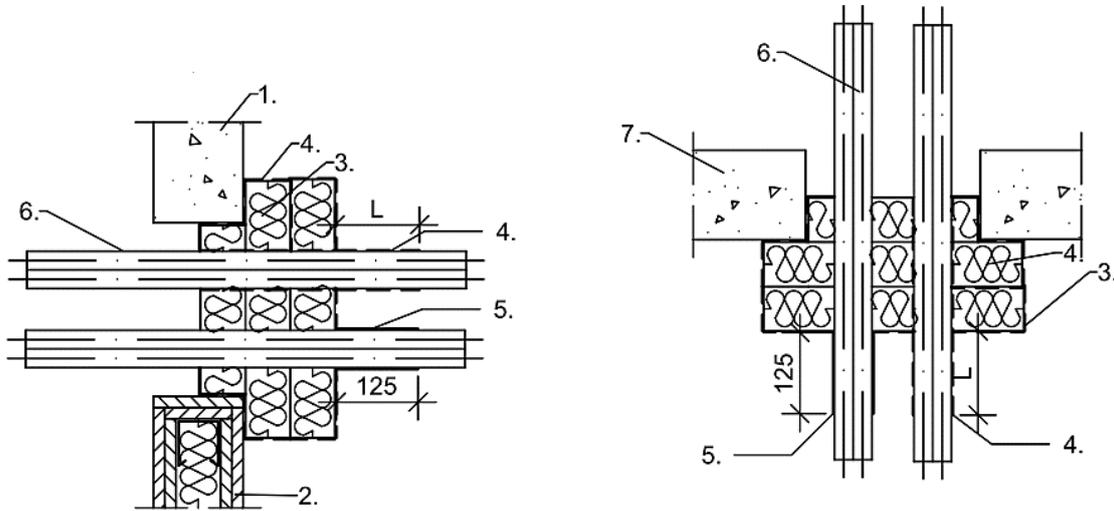

- 6. Non-combustible pipe
- 7. Floor ≥ 150 mm thickness

Dimensions in mm

Mixed penetration seal made of mineral fibre boards with ablative coating ($\geq 0,75$ mm dft) for one-sided installation in shaft wall, walls and floors

Installation in walls and floors, 3-layer

Cables, cable bundles and cable trays with ablative coating or with intumescent wrap

Fire resistance classes			
Service	Measures	Wall Fire resistance class	Floor Fire resistance class
