

BK-N

Fire protection pillows

Description

High performance cooling fire protection pillows, which are particularly easy to install. The pillows can be used for permanent as well as for temporary sealing. They can be used several times without losing their technical properties.

Application Areas

- Cables and electrical lines up to max. 80 mm single diameter
- Application in solid walls, plasterboard walls and solid floors
- Can be used for permanent and temporary sealing
- Especially suited for computer rooms because of dust and fibre free material

Delivery and Packaging

Fire protection pillows BK-N				
Packaging			box	
Size	Dimensions [mm]	Weight [mm]	Quantity	Item number
